Subject: RE: Potential Dates for upcoming HAMP related meetings

Tim,

That's great news that you've made progress with the tribal council, villages and the HUC.

It looks like Brad Rea is out the week of August 28th so I'm now aiming for September 6,7 or 8th for our technical meeting with USDA. Since user rates are a key issue with USDA I think it would be best to have Brad in attendance. I plan to circle back with USDA today and send out a save the date for one of those days. Do those dates work for you and the HUC?

I also agree that we should likely delay the council meeting until after our meeting with USDA. Of the remaining council dates, I could possibly do it on the 21st of September but I can't the 18-20th. The October dates work, the only caveat is that funding a trip that first week of October gets dicey with our travel funding and I wouldn't be able to confirm any October dates until late September.

And yes let's set a date for the first week of August with HUC, IHS and EPA (phone call) to talk strategy. If you both could send me your availability for a call July 31- August 3rd that would be great.

Thanks!

Please: All data submittals to our office should be sent by email to datamanager@epa.gov with a copy to me (or your project manager in the Drinking Water Office). Data reports are due no later than the 10th of the month following the month that you receive results, or the 10th of the month following the compliance period, whichever comes first. Please include the whole lab report and copy of the Chain of Custody. Label with PWS name and number; & source or distribution system location codes or names for data collection points.

Subject: Potential Dates for upcoming HAMP related meetings

Emmanuelle + James,

Significant progress and improved tribal communications were achieved today in HAMP meetings with Tribal council, village representatives and HUC Board of Directors.

The appropriate HUC representatives are available to meet in technical meetings with IHS and EPA the first week of August and USDA, IHS & EPA R9 drinking water the week of August 28. Let me know if I got these potential dates correct?

The tribal council wonders if it may be more productive to meet with IHS and EPA in late September after we have formulated an approach to USDA RD PER final comments and IHS addenda.

Thanks.
